

RSV pilot study: Challenges

India perspective

Mandeep Chadha
National Institute of Virology,
Pune, India

- **Challenge** :-

Difficulty in enrolling SARI cases

- Above 65 years of age as per weekly sampling.
- Infants below six months

- **Solution** :-

- Have added a new site, i.e. a geriatric ward /clinic for the elderly
- Enrolling ARI patients

- **Challenge**:- India is a large country with diverse climatic condition, inadequate representation of data from Indian Sub-continent.
- **Solution**:- can add site (NIV already has sites running for Influenza surveillance across the country)- Multisite surveillance.

- **Challenge:-** Difficulty in uploading and viewing the data.
